

Brighter Day

Code Black

Day

There will be a brighter day

There's people all around the world that need a helping hand to hold

Just reach out to your fellow men, yeah

Help them any way you can

Like a river runs into the sea

Come on dude and follow me

We can ride our way along

And take a place under the sun

Let me show you the way

To find a better place

If we only hope and pray

There will be a brighter day

[2x]

There will be a brighter day [5x]

There's people all around the world that need a helping hand to hold

Just reach out to your fellow men, yeah

Help them any way you can

Like a river runs into the sea

Come on dude and follow me

We can ride our way along

And take a place under the sun

Let me show you the way

To find a better place

If we only hope and pray

There will be a brighter day

[2x]

There will be a brighter day [6x]
