

The Remedy

Blake Lewis

This is a remedy...You're runnin' from, all that you said to me
We fell apart, and then just let it be
I know that I don't wanna say goodbye.
All alone, this world can be so empty
But what we have, is not an ordinary love
It's more than just enough So tell me now girl...
Are you listening? Are missing me? Is everything alright? (everything alright)
If you're listening, let me hear you say the words I need tonight-ight-ight, need tonight-ight-ight
The sound could save our life, if we follow the melody, follow the melody.
When love is on the line, this is the remedy, this is the remedy
Cuz' everything inside of me, is calling out for you to see
This sound could save our life, if we follow the melody, before we're out of time
I never know, enough to find out what it takes, to fall apart, and watch you walk away
Now I know, losin' you is my mistake, ohhh.
Hours pass, and slowly turn to days
I want you back, the only one for me is you
What am I to do? So tell me now girl...Are you listening? Are you listening? Is everything
alright? (everything alright)
If you're listening, let me hear you say the words I need tonight-night-night, need tonight-night-
night
The sound could save our life, if we follow the melody, follow the melody.
When love is on the line, this is the remedy, this is the remedy
Cuz' everything inside of me, is calling out for you to see
This sound could save our life, if we follow the melody, before we're out of time This is the
remedy, ohh(before we're out of time)
This is the remedy, ohh(before we're out of time)
This is the remedy, ohh(before we're out of time)
This is the remedy, before we're out of time
The sound could save our life, if we follow the melody, follow the melody.
When love is on the line, this is the remedy, this is the remedy
Cuz' everything inside of me, is calling out for you to see
This sound could save our life, if we follow the melody, before we're out of time(before we're
out of time)
(before we're out of time)
(before we're out of time)
(before we're out of time)
