

# Light Rays

## Noosa

You do everything they ask you to , have you given up?  
They take away all your shooting stars but you're looking up  
Let me be the sunrise of your broken heart  
The new day's calling sky is falling but you're looking up

And who do you see?  
I'm sending from far away  
And who do you see?  
Your future in light rays

Words you wrote are singing through your starry eyes  
I remember curtains calling before you even arrived  
Walking slower, staying closer, have you come around?  
Keeping quiet never sounded quite so loud

And who do you see?  
I'm sending from far away  
And who do you see?  
Your future in light rays

Crystal balls and evening calls have you freaking out  
But I'll supply good love and vibes when you sleep at night  
If you could tell me one thing that is on your mind  
Who betrayed your trust and gave you something to worry about

And who do you see?

Would you be my life and run with me tonight?  
Would you see my light that follows you?  
Would you see my light that follows you from right between my eyes?

I'm sending from far away  
And who do you see?  
Your future in light rays
