

Vacation

Widespread Panic

Almost 23
Took a trip to the sea
Went out for a swim and the waves came
Crashing down on me
Turn to head back in
That's when I saw a fin
As panic grabbed my legs you know
It pulled me in
Well I didn't see you were right next to me but I'm so glad you could make it
With you by my side I'm gonna get back alive from my next vacation
Mountains looked like fun
Climbed up to the sun
From a peak I got such a view
Forgot to hang on
Wind came rushing in
Broke my safety pin
As I flew by you threw me a line
Saved again
Well I didn't see you were right next to me, but I'm so glad you could make it
With you by my side I'm gonna get back alive from my next vacation
Took a trip over there
To see how I'd fare
Got on that little white boat
I didn't have a care
Third day at sea
We began to sink
They said women and children first
I said, Guess that's not me
But you came along with a raft and a song and I'm so glad you could make it
With you by my side I'm gonna get back alive from my next vacation
I didn't see you were right next to me but I'm so glad you could make it
With you by my side I'm gonna get back alive from my next vacation
