

This Is America (feat. Prodigy and un Pachino)

The Alchemist

For for tomorrow.
Really. OK.
This is America. I could say fuck that made you.
Hedjet nigga.
It looks good. This is
America. I could say Fuck Albany due out whenever they don't fuck with that you got this
America.
Before the pilgrimage, European stole his life in the Indians and they made millions of black
slaves.
Do the hard work so they could get paid.
They set up shop and thank you systems they made up but lifestyle made you want to live it.
Live that dream that American Dream is just one thing.
It's only a dream. Wake up nigga wake up,
bitch, teach the kids about the lies in the midst of what's fake religion sponsor bullshit.
With God and Jesus is big business,
it sounds demented little, demonic,
dealt with cycle fucking psychotic.
The gods. We got this,
we gonna stop them we gonna put a big spotlight on them the future crazy horses nothing he's a
puppy purely nothing.
This is something much more bigger this America home of the infamous sentence America I
could say fuck that I don't believe you I don't want nothing at all.
But we get nigga this
America. This is America.
I could say Fuck Albany due out whenever they don't fuck with Jack and God kill you.
This is America.
Step out the crib, akome filler eyes or loyal mean they got me like a piece of shit with flies or
lonely black helicopters army after yards or lower me.
I'm trapped they could snatch me anytime they want but this bug they never locked me it won't
be out walking my route so they can watch me on computer
