

Honeycomb

Animal Collective

How many times you say I'm through with this and you mull it over?

How many times you say I'm sticking to this and you pull it over?

(How?)

How many times you say I'm finished with this but it starts all over?

(How?)

How many times you say I'm moving to this but it won't move over

How many times you say I'm through with this and you mull it over?

How many times you say I'm sticking to this and you pull it over?

(How?)

How many times you say I'm finished with this but it starts all over?

(How?)

How many times you say I'm moving to this but it won't move over

How many times you say I've had it today I just can't control this

You've seen the other side of unused time and numbness of feelings

How many times you say I'm through with this and you mull it over

How many times you say I'm sticking to this and you pull it over

(How?)

How many times you say I'm finished with this but it starts all over

(How?)

How many times you say I'm moving to this but it won't move over

How many times you say I've had it today I just can't control this

You've seen the other side of unused time and numbness of feelings

How many times you wait but nothing today and evening is over

The sun has gone and made a glowing line in your pretty brown eyes

If you fill up your heart, it spills outside

You'll find everything inside the heart on top of the hive

And you'll fight like a dog, you won't go wild

Even in all the impossible places you'll go in your life

How many times you say I've had it today I just can't control this

You've seen the other side of unused time and numbness of feelings

How many times you wait with nothing today the evening is over

The sun has gone and made a glowing line in your pretty brown eyes

If you fill up your heart, it spills outside

You'll find everything inside the heart on top of the hive

And you'll fight like a dog, you won't go wild
Even all the impossible places you'll go in your life
If you fill up your heart, it spills outside
You'll find everything inside the heart on top of the hive
And you'll fight like a dog, you won't go wild
Even all the impossible places you'll go in your life
Life
Life
Life

If you fill up your heart, it spills outside
You'll find everything inside the heart on top of the hive
And you'll fight like a dog, you won't go wild
Even all the impossible places you'll go in your life
Hive
Hive
Hive
Hive
Hive
Hive
Hive
Hive
