

Kanon

Enon

All tails in the sky
Melted in your mouth
There were fireworks
Sparkled and rained in ocean
Talk talk
You don't talk
I will close your window
There was milky way
Let ones acrossed each other

You reached in my skull
Sunset by the water
And you found your way to the stairs to heaven
A new scar when you cross
I felt small explosion
Let you slip away
And I wrote another fiction

A silent song you're singing a shy nocturnal song
In wasted tears you're swimming
You will drown and sink
Did you wanna shoot the sun?
Here it comes the moon
Eyes on eggs on a plate and waiting for another tray

Kanon kanon kanon.....
