

Alexander Graham Bell

Five Eight

Some starry disposition. sun lamp focus on the mission. marks made with crayon wipe right off your cheek. the purple energy beam keeps the bloodstream clean. well now you recognize the triumph of tv. yeah your malignancy now. i know how wrong i could be. about your scientific triumph. watson watson come in here please. you know i'm down on my knees. mr. performer alexander heal the blind man. stave off the anger. mix the color purple for the healthy body sight. in the coffee cup rooms. where we all talk of doom. well now i recognize the triumph that is tv. your malignancy. now i know how long it could be. about your scientific triumph. watson watson come in here please. you know i'm down on my knees
