

Carrie

SPEAK

I've got a mindfull
That I know you won't stand for
It was a hard one
To get a line on line on
And it's a handful
To have us going mental
It's a hard one
To get on your own your own
Carrie, I trust you to get on alone
Make me a friend when you're out on your own
Carrie, I need you to get on alone
Trust me, you can't make it good on your own
I know it's hard, love
To show me where you came from
When you're the last one
To get along get on get on
I see nothing worth describing in your face
If I can't describe you, girl, then how can I relate
Give me cause to trust in anything you say
How can I believe in you and not your faith
