

Sitting On the Moon

Helalyn Flowers

Once again I'm sitting on the moon
It's too late to follow me now
I stay in front of many years
A glittering silence that nobody knows Let me shine Let me smile
Let me kiss the sky
Let me shine Let me smile
And tell me, tell me why? Do you really want to learn to fall?
Everything is within time
Everything I can find
Do you really want to learn to fall?
Everything feels alive
Rip the stars from my world
Feel me now (2X)
So
Feel me now (2X)
Cause everything is alive
Even means I can fly
Once again I'm sitting on the moon
I'm not afraid of what is around
How strange in front of many years
A glittering silence that nobody knows Let me shine Let me smile
Let me kiss the sky
Let me shine Let me smile
And tell me, tell me why? Do you really want to learn to fall?
Everything is all the time
Everything I can find
Do you really want to learn to fall?
Everything feels alive
Rip the stars from my world
Feel me now (2X)
So
Feel me now
Cause everything is alive
Even means I can fly
Nobody else believes it
Nobody else can reach it
Take a deep breath now
And sit on the moon next to me Nobody else believes it
Nobody else can reach it
Take a deep breath now
I'll let you dream the stars are round my world Nobody else believes it
Nobody else can reach it

Take a deep breath now (2X)
And sit on the moon next to meCause everything is alive
Even means I can fly
