

Up All Night

Beck

When you get the rhythm and words all make you cold
When you break it down and this world is all you know
 Hands up, you're waving it around
 Now get yourself together
When you count the dominos fall, it's time to go Now I'm feeling so far away
 I see the colors and all the kids going home
 Night is crawling into the day
 I hear my voice ringing
 The summertime's singing
 Just want to stay up all night with you
 Just want to stay up all night with you
 There's nothing that I wouldn't rather do
 Just want to stay up all night with you
 I'll keep it moving
 Don't wait for nothing now
 I gotta keep it moving
 Don't wait for nothing now
 I'll keep it moving
 Don't wait for nothing now
 I gotta keep it moving
 Don't wait for nothing now
 1,2, what you doing?
 I've been jumping through some hoops
 Want to get my body loose
 Want to tell you, tell you what to do
I've been running on the grass like an animal struggling
 Looking for a diamond
 I'm trying, I'm fighting
 Back into the rhythm now
 I just want to stay up
I just want to stay up all night with you
 With you, with you
 Just want to stay up all night with you
 Just want to stay up all night with you
 There's nothing that I wouldn't rather do
Just want to stay up all night with you Hands up in the air
 If you don't really care
 Living on [?] there
If you got the climb to take it up there Hands up in the air
 Living out on a prayer
 Never know that you're there
 Nothing that I want but rather be there
